---

Hi Kim – attached are a few edits to the letter. I learned late this afternoon (see attached email) that Joe Close got in touch with Rod on 2/17/17, very shortly after the contract was awarded to us, and Joe made a request that Wood have a standby pump and piping available while we are working near the sewer line. Rod forwarded that email to me on 2/21/17 and I passed it on to our design management team the same day. However, it appears that this slipped through a crack and the requested measures were not incorporated in the pipe protection plan.

I tried softening the letter a bit. Reality is that we did communicate with the Sewer District numerous times, provided them with the proposed plan, but were not notified by them of the additional requirements. However, we were notified by Rod of the District's request in Feb 2017, and we have no issue complying with their request.

Their letter/approach did seem a bit harsh considering that we would comply, but I now understand that they had made the request nearly 18 months ago. Let me know if you would like to discuss

Eric

**Subject:** Letter to South Fork Sewer District

Eric,

Please see the attached draft response to SF Sewer District. I'd appreciate your review and check that I am accurately portraying the chronology of events and path forward.

Thanks,

Kim
